

Are routers on fiber optic cables any good

Overview

Most routers designed for cable or DSL internet are not inherently incompatible with fiber, but their ability to deliver the *full* speed and performance of your fiber connection is often limited. Standard routers are designed to work with specific types of. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. After testing dozens of routers specifically for fiber connections, I've found the ones that actually deliver on the promise of high-speed internet. In this guide, I'll share my hands-on experience with the top routers that maximize fiber performance without breaking the bank. Keep reading for a rundown of the best fiber optic internet routers in 2026.
