

Fiber optic cable connection to wireless AP

Overview

Yes, you can connect a fibre optic cable to a wireless router. As internet speeds continue to evolve, fiber optic broadband is becoming the gold standard for ultra-fast and reliable internet connections. This high throughput is essential for handling large volumes of data quickly and efficiently, making it ideal for bandwidth-intensive applications such as video streaming, cloud computing, and large-scale data. Struggling with Wi-Fi coverage over long distances?

Learn how to use fiber optic cables to connect access points and achieve extended, reliable Wi-Fi coverage. In this video, we'll walk you through the entire process, from understanding the basics to installing and testing your new setup. The AP should be placed in single band antenna mode and AIR-ANT2413P2M-N= should be connected to Antenna Ports 1 and 2, and AIR-ANT5114P2M-N= should be connected to Antenna Ports 3 and 4 on the AP. Wireless allows the user to roam unencumbered by cabling within the service area covered.
