

High-precision jumpers from Egyptian MPO manufacturer direct supply

Overview

As a direct source factory, we specialize in 100% bespoke, ultra-low loss jumper cables tailored for seamless switch-to-switch and switch-to-panel routing. Eliminate cable clutter and ensure maximum airflow with our exact custom lengths and ultra-flexible micro-jackets. The MTP® jumpers allow for the seamless migration to higher data rates for multimode systems in the data center when used in conjunction with our trunks. Optimize your rack space with Wolontek's precision-engineered MTP/MPO patch cords. Normally, this kind of MPO jumper can transmit multiple polarization-maintaining optical signals and keep their polarization orientation unchanged at the same time. Fiber count: 8, 12, 16. NADDOD's MTP/MPO cable assemblies provide exceptional high density transmission performance and low signal losses. Used to directly interconnect MPO.
