

How long is the jumper wire for the distribution box door

Overview

The wiring length between the distribution box and dispensers is not to exceed 2600 feet, and requires stranded or solid 14AWG wire. Do not use daisy chaining with this unit. For Transac System 1000 multiple console installation, refer to MDE-2538 Pigtail Cable Kit Instructions. If using panelboards for service equipment, provide each one with a main bonding jumper to connect the service neutral conductor to the panelboard's metal frame [408. 28 (D) (1), which refers us to Table 250. Whether in a home or an industrial facility, this box keeps your electrical setup organized, functional, and efficient. This distribution box works with all Gilbarco electronic fuel dispensing. According to the National Electrical Code (NEC), the conductor must be long enough to extend outside the box's opening.
