

How long will it take to expand optical module production capacity

Overview

The global production capacity of 400G optical modules is expected to reach 10 million units by 2024, up from 2. Supply chain disruptions in 2022 caused a 15% delay in delivering high-speed optical modules to data center clients, primarily due to. Data centers will keep dominating optical module demand as AI and cloud drive revenue growth through 2030. Optical module demand is being pulled in two directions at once, faster bandwidth for dense networks and tighter constraints on power, security, and lead times. 6T technologies leading the industry transformation. Chinese companies occupy a dominant position in global competition. 6 billion by 2034, advancing at a compound annual growth rate (CAGR) of 11. 49 USD Billion in 2025 to 15 USD Billion by 2035.
