

How much does it cost per core for fiber optic cable splicing and termination

Overview

For most commercial projects, expect to pay \$50-\$150 per fusion splice point - but that number can swing in either direction based on the factors below. Fiber optic splicing costs vary widely depending on project size, location, fiber type, and site conditions. The "per splice" rate is the most. The total expenditure for splicing a fiber optic cable is rarely a flat fee. Instead, it is a calculation based on the number of strands, the environment of the repair, and the precision required for the specific network application. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Understanding these factors can help businesses and individuals budget effectively for fiber optic.
