

## Iraq power distribution box renovation

### Overview

The Iraqi Ministry of Electricity has announced a plan to enhance Baghdad's power grid ahead of summer 2025, including the installation of 74 new substations and the rehabilitation of 900 distribution feeders (33/11 kV). The initiative aims to address growing electricity. Three years after the US-led war against Iraq that started 20 March 2003, Iraqis still suffer from power cuts that reaches to 12 hours on daily basis. Three years after an invasion turned their lives upside down; Iraqis describe a daily reality of pervasive insecurity, lack of basic services and. According to the Environmental and Social Management Framework (ESMF) which was prepared for the Iraq Social Fund for Development Project disclosed locally in Iraq and on the World Bank's website<sup>1</sup>. Environmental and Social Management plan (ESMP)/ Environmental and Social Management should be. At construction sites across Iraq, cranes and backhoes are marking a new chapter in the country's future: After a period of conflict and unrest, Iraq is moving forward to reclaim its economic potential. The new infrastructure will resolve energy transmission bottlenecks in. The project consists of one MV Power Plant building, one Telephone Exchange building, renovation of Existing Power Plant building, renewal of MV infrastructure including MV switches, MV cables and MV ductbanks for the entire embassy compound and renewal of perimeter lighting of the compound.
