

KAZ relay protection What does KAZ refer to

Overview

KAZ is a non-fuse actuator (not a fuse) for use in parallel with a 50 amp or greater fuse to provide indication a fuse has opened by opening at 10 or more amps. The KAZ can also be applied in a 1-, 2- or 3-pole block with miniature signaling switches to provide remote status. KAZ 10 2180000001 Installation and Safety Instructions Other Measures Surge Protection Device, 5-way With remotely-fed antenna amplifiers, no additional protective circuit About This Guide This document is part of the product. ► Do not install or use the device until you have read and understood. Lightning current arrester – Coarse protection for higher leakage currents – 5-2400 MHz – F connections – Remote power supply < 60 V DC/2 A With ÜsAg (gas arrester). ÜsAg are the classic surge protection elements in coaxial networks [cleverreach cleverreach-sign-up "Subscribe to our newsletter! You. Remote power feed (max.): With üsAg (gas arrester). Kathrein KAZ 12 overvoltage protection. The necessary accessories are required to use the article as described. If you want, you can also download image file to print, or you can share it with your friend via Facebook, Twitter, Pinterest, Google, etc.
