

North Korean High Voltage Electrical Equipment

Overview

The High Voltage Equipment Market in North Korea serves the power generation, transmission, and distribution sectors, providing equipment such as transformers, circuit breakers, and switchgear for high-voltage applications. Domestic manufacturers produce high-voltage equipment to meet the country's. Korea's three major power equipment makers — Hyosung Heavy Industries (298040. KS), HD Hyundai Electric (267260. 1 billion) in new orders in the first quarter, pushing their combined order backlog past 32 trillion won. A ultra-high-voltage transformer manufactured by LS Electric subsidiary LS Power Solution. /Courtesy of LS Power Solution ◇. Hyosung Heavy Industries was the first company in Korea to successfully develop a high-voltage direct current (HVDC) system using the MMC method, which is the most advanced technology for voltage converters. client that products sourced from the Korean firm's primary market rival failed to meet. The agreement aims to explore joint business opportunities for HVDC projects in the Republic of Korea, provide greater customer value, and ensure grid reliability.
