

Optical fiber lines to Europe and America

Overview

Explore the physical backbone of the internet with our interactive map of undersea fiber optic cables, peering exchange points, and more. Visualize the growth of global connectivity. Our network is the most expansive owned infrastructure network spanning Europe and the Atlantic. Use the controls at the top to play the animation or step through year by year. In the 19th and early 20th centuries, each cable was a single wire. Late in the 20th century, all. The United States and European Fiber Optic Cable Market Report is Segmented by Cable Type (Loose-Tube, Tight-Buffered, and More), Mode (Single-Mode, Multi-Mode), Deployment Type (Underground, Aerial, Submarine), End-User Industry (Telecommunications, Power Utilities, and More), and Geography. The. At ZORA, we specialize in innovative fiber optic solutions tailored to these regional nuances. com to explore how ZORA can meet. Wholly owned and operated by Aqua Comms, AEC-1 is our flagship Transatlantic route: seamlessly connecting the US with Ireland and the UK via a secure fibre optic network.

US & European Fiber Optic Cable Market Forecasts 2031

The United States and European Fiber Optic Cable Market is segmented by end-user industry (telecommunication, power utilities, defence/military, industrial, and medical) and by country ...

Fiber Map of the World 2026

Fiber maps visualize the global network of fiber optic cables, showcasing how data moves across continents and under oceans. Telecommunications providers rely on these maps to optimize routing, ...

EXA Infrastructure: Connecting Europe and North America

Our routes extend throughout Europe and North America, crossing the Atlantic via eight diversified subsea cables (three wholly owned and operated), including EXA Express, a 4,600 km high ...

Our Network | Global Network Internet & Fiber Maps | Zayo

Find core wavelength, long haul dark fiber, & IP network maps across the U.S.A. & world.

Transatlantic communications cable

All cables presently in service use fiber optic technology. Many cables terminate in Newfoundland and Ireland, which lie on the great circle route from London, UK to New York City, US. There has been a succession of newer transatlantic cable systems. All recent systems have used fiber optic transmission, and a self-healing ring topology. Late in the 20th century, communications satellites lost most of their North Atlantic telephone traffic to these low-cost, high-capacity, low-latency cables. This a...

20 Largest Fiber Optic Cable Companies (2025 List)

This updated list ranks the 20 largest fiber-optic cable companies worldwide and summarizes what each vendor is best known for—core product lines, regional strengths, and typical project fit.

Internet Infrastructure Map (2026)

Explore the physical backbone of the internet with our interactive map of undersea fiber optic cables, peering exchange points, and more. Visualize the growth of global connectivity.

AEC-1 Subsea Cable

Our AEC-1 cable system provides reliable transatlantic connectivity between Europe and North America, ensuring smooth data flow across the Atlantic.

Transatlantic communications cable

All cables presently in service use fiber optic technology. Many cables terminate in Newfoundland and Ireland, which lie on the great circle route from London, UK to New York City, US.

Discover Arelion as a global network provider | Arelion

The global network provider Spanning 77,000 km of our own fiber, and using state-of-the-art DWDM and IP technology, our network infrastructure connects Europe, North America and Asia.

Europe, North America, APAC: What Are The Unique Demands in ...

Explore the unique demands of the fiber optic markets in Europe, North America and the Asia-Pacific! From sustainable development in Europe to AI-driven data centers in North America, ...
