

QSFP28 Optical Module SFP Technical Specifications

Overview

The QSFP28-100G-ZR4-S Module is designed for use in 100GBASE Ethernet throughput up to 80km over single mode fiber (SMF) using a wavelength of 1310nm via duplex LC connectors. Taking BOX+FPC+PCBA separate design, it has great reliability, airtightness and heat dissipation. The QSFP28- 100G modules are our latest generation of 100G transceiver modules solution based on a QSFP28 form factor. The extended case operating temperature allows customers to support a aggregate data rate of 100GbE. The QSFP28 SR4 transceiver is a high-performing module for SR optical. In this guide, we provide a comprehensive, practical overview of 100G QSFP28 modules, covering their working principles, module types, key specifications, typical applications, and a step-by-step selection framework to help you make confident, informed decisions for your network. It is also qualified for use in Mellanox InfiniBand EDR end-to-end systems.
