Motor Protection Relay REM610REM610

The phase reversal protection is based on the calculated negative-phase-sequence current and detects too high NPS current values during motor start up, caused by incorrectly connected phases, which in ...

Schweitzer Engineering Laboratories SEL-701 Instruction Manual

What is the primary function of the Schweitzer Engineering Laboratories SEL-701 Relay? The SEL-701 Relay is designed to protect three-phase, medium voltage motors. Its basic functions include locked ...

EMR-3MP0 motor protection relay

The EMR-3MP0 motor protection relay provides an instantaneous phase overcurrent function to trip the motor for high fault current levels and save the fuses. This function can be disabled and has an ...

MP-3000 motor protection relay

The MP-3000 provides protection when the relay is in the Program mode; therefore, the only time the Protection LED is extinguished is when the "DISARMED" feature is used and also for the brief time it ...
