

Southern European Low-Voltage Distribution Box Testing Company

Overview

DERlab and its member laboratories, research institutes and companies offer testing, validation and certification of Distributed Energy Resources (DER) and smart grids. The preferred modular solution for low voltage panel boards. Flexible, safe, and thoroughly tested. Individual components as well as complete systems can be tested according to international and national standards or certification. Meeting and exceeding a wide range of international standards, our Modular System is a valid option for high impact industries and demanding environments. The Logstrup Modular System is thoroughly type tested, proving that our switchboard and switchgear solutions are safe and reliable during. Electric box UAB is a private limited liability company with over 18 years' experience in the manufacture and installation of professional electrical engineering equipment. Integrity, responsible attitude to work, professionalism, quality, and efficient solutions are the values to which the company. Laboratory which makes it possible to carry out more than 300 types of electrical tests (power, high voltage, LV, MV, power electronics and environmental tests), ISO, UL, ASTM, CEN, NF, IEC and UNE tests. We also have over 25 years' experience in electrical testing and our experts take part in. Kema Labs LV test laboratories have been in operation for more than six decades. We have more than 15 test bays that can test that products meet international product design requirements and comply with international standards. Panels are tested in our own labs against the IEC 61439-1 standard, and.
