

What should be labeled on the secondary distribution box at the construction site

Overview

As part of the hazard communication program, all secondary containers should be labeled using the HMIS, NFPA, or other suitable labeling system. One essential aspect of electrical safety is the proper labeling of industrial electrical and control panels. Proper labeling not only helps prevent accidents but also ensures compliance with different safety standards. Workplace must, at minimum, display the product identifier (the chemical's name or number. Whether you're working on a construction, renovation, or industrial project, reliable temporary power solutions are essential. As federal and local regulations regarding jobsite safety evolve. Displaying title 29, up to date as of 5/07/2026. Title 29 was last amended 4/30/2026. Further complicating the matter is that local inspectors are not enforcing required codes for labeling, which.
