

Where are AI servers manufactured

Overview

Taiwan's commanding position in global server manufacturing has positioned it perfectly for the AI boom, with the island accounting for over 90% of global AI server builds and approximately 80% of all server shipments worldwide. Beyond providing the physical hardware, customers have come to expect AI server Original Equipment Manufacturers (OEMs) to offer cooling technology, infrastructure management software, and professional services. To bring clarity to the. In October 2023, Quanta revealed plans to open three new factories in California, USA, with the goal of creating state-of-the-art assembly lines for AI servers. Around the same time, Wiyynn shared its intentions to launch a server cabinet assembly plant in Johor, Malaysia, featuring advanced liquid. Apple has begun delivering Houston-made AI servers to its data centers nationwide ahead of schedule, a step in scaling its in-ecosystem AI while reshoring some of its manufacturing.
