

Which is the world's first AI inference server

Overview

OXFORD, England, April 29, 2026 — Lumai, a developer of optical computing for scalable AI, has launched its Lumai Iris inference server. This marks a milestone in AI. With two integrated NVIDIA RTX 2000 Ada GPUs, custom-designed thermal management, and a proprietary edge device management software framework, the MAXER-5100 sends a strong statement of intent. Leading provider of advanced AI solutions AAEON, has released a new addition to its AI Inference Server. Leading provider of advanced AI solutions AAEON has released a new addition to its AI Inference Server product line, the MAXER-5100 - the world's first 8L AI inference server equipped with two integrated GPUs. Its open source nature allows it to support your preferred generative AI (gen AI) model, on any AI accelerator, in any cloud environment. Powered by vLLM, the inference server maximizes GPU. We are excited to introduce FuriosaAI's NXT RNGD Server—our first branded, turnkey solution for AI inference. Built around our RNGD accelerators, NXT RNGD Server is an optimized system that delivers high performance on today's most important AI workloads while fitting seamlessly into existing data.
